

PAUL HAROLD BATILES

Full Stack Web Developer

Sampaloc, Manila, Philippines | +63 920 527 8696 | Paulharold.batiles@gmail.com

Portfolio: <https://paulharold-batiles-portfolio.vercel.app/>

PROFESSIONAL SUMMARY

Full Stack Web Developer and Cum Laude BS Information Technology graduate with hands-on experience building responsive web and mobile applications across the React, Next.js, and Node.js ecosystem. Skilled in developing RESTful APIs, designing relational and document database schemas, integrating third-party and AI APIs, and deploying production applications. Proven ability to translate UI/UX designs into clean, accessible, reusable components and deliver full-stack features end to end.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, PHP, HTML5, CSS3, SQL

Frontend & Mobile: React.js, Next.js, React Native (Expo), Tailwind CSS, Framer Motion, Bootstrap, Material UI

Backend & APIs: Node.js, Express.js, RESTful API Development, JWT Authentication, AI API Integration, MVC Architecture

Databases: MongoDB (Mongoose), PostgreSQL (Supabase), MySQL, Firebase

Concepts: State Management, Responsive Design, UI/UX Implementation, Web Accessibility, Software QA Testing, Role-Based Access Control

Tools & DevOps: Git & GitHub, Vite, Vercel, Render, Postman, Android Studio, Linux/Bash, VS Code, Claude Code, Gemini

PROFESSIONAL EXPERIENCE

Front End Developer

Codebility

- Built user interfaces for mobile applications using React Native (Expo Go).
- Integrated Firebase for backend connectivity, authentication, and real-time data handling.
- Translated UI/UX designs into responsive, reusable, and functional components.

Business Application Developer / QA

NOAH Business Application

- Created and executed test scenarios and test cases for the development team.
- Documented issues and collaborated with developers to resolve bugs and improve software quality.
- Reviewed system workflows and supported process improvements based on testing results.

PROJECTS

BugTrack — QA Management System (MERN)

bug-track-ten.vercel.app

- Built a full-stack QA management platform (Jira/TestRail hybrid) using React 19, Vite, and Tailwind CSS with a Node.js and Express 5 REST API backed by MongoDB and Mongoose.
- Implemented JWT authentication and server-enforced role-based access control (QA, Developer, Manager), including permission-gated bug status transitions and per-project human-readable IDs.
- Engineered a dashboard endpoint using parallel MongoDB aggregation pipelines to compute pass/fail rates, open-bug severity breakdowns, 30-day trends, and a weighted release-readiness score; deployed frontend and backend as separate Vercel serverless apps.

InnFind — Hotel Reservation Platform (MERN)

innfind.vercel.app

- Developed a full-stack hotel reservation platform for properties across the Philippines using React 19, Vite, and React Router v7 with a Node.js/Express REST API and MongoDB/Mongoose.
- Implemented JWT authentication with persistent session restoration and role-based admin access, plus booking creation featuring server-side date-overlap validation, automatic price calculation, and unique receipt-number generation.
- Built bookmarkable URL-based search filters, a review system gated to completed stays with denormalized hotel ratings, and an admin dashboard for managing hotels, rooms, bookings, and revenue stats.

Anivie — Anime & Movie Watchlist Platform (MERN)

anivie.vercel.app

- Developed a full-stack watchlist app where users discover content and track watch status, ratings, and diary notes, with a React 19 + Vite frontend and an Express 5 + MongoDB Atlas backend deployed as separate Vercel services.
- Integrated the Jikan and TMDB REST APIs to power discovery across thousands of anime and movie titles, using a prefixed-ID convention to prevent collisions between data sources.
- Implemented JWT authentication with email verification (Nodemailer) and protected watchlist CRUD endpoints, with a global Axios interceptor managing auth headers per destination.

Midnight — PC Hardware E-Commerce Platform

midnight-shop.vercel.app

- Built a full-featured e-commerce platform using React 19, Vite, React Router 7, and Tailwind CSS, backed by Supabase (PostgreSQL, Auth, Storage, and Edge Functions).
- Developed a comprehensive admin dashboard with product CRUD and image uploads, order management, category discounts, product bundles, and voucher codes with usage limits and expiry.
- Implemented role-based access (admin/customer), a localStorage-persisted cart and favorites with promo-code support, and a newsletter broadcast powered by a Supabase Edge Function.

Snypp — Real-Time Collaborative Workspace

snypp.vercel.app

- Built a real-time collaborative workspace app with Next.js 16 (App Router), React 19, TypeScript (strict mode), and Tailwind CSS v4, using Supabase for authentication, PostgreSQL, and live data.
- Implemented Kanban boards with drag-and-drop and snippet boards, with role-based access control (owner/member/viewer) gating edit and invite permissions.
- Enabled real-time multi-user sync via Supabase postgres_changes channels with a polling fallback, plus email/password and Google OAuth authentication with token-refresh middleware.

EDUCATION

Bachelor of Science in Information Technology

Technological Institute of the Philippines | 2021 – 2025

- Graduated **Cum Laude** (GPA: 1.42 on a scale where 1.00 is the highest grade).

CERTIFICATIONS

Responsive Web Design — freeCodeCamp, 2025
